

■ Connectify Chat Application – Quick Start Guide

1■■ Start the Server

1. Open terminal
2. Navigate to the folder where **Server.java** is saved
3. Run:

```
javac Server.java  
java Server
```

2■■ Start the Client

1. Open another terminal
2. Navigate to the folder where **Client.java** is saved
3. Run:

```
javac Client.java  
java Client
```
4. When the client starts, it will ask you to enter your **name**.

3■■ Start Chatting

- After entering your name, the client connects to the server automatically.
- Messages you send will appear on your screen and will be broadcast to all connected clients.

4■■ Chatting on Another Device

- To chat using multiple devices:
 - Ensure the **server device** and all **client devices** are connected to the **same network**.
 - You can use the same Wi-Fi or the same Mobile Hotspot.
 - Only devices on the same network can connect to the server.
